How to upgrade, install or replace memory on M5A97 R2.0 Motherboard? Installing memory on a Motherboard is quick and easy. Please check this ASUS Motherboard Memory Installation Video, this is a generic memory installation procedure for ASUS Motherboard. For more help on adding extra memory on M5A97 R2.0 contact our live support. Motherboard Memory Installation Video Your browser does not support iframes. Click here to talk to us now! Your browser does not support iframes. I've read on here a lot of people are having trouble getting RAM to work in this motherboard. I'm after 2x4gb RAM, the motherboard isn't on Corsair's memory finder either. I just want RAM that will go in, and have no problems or manual changes. Go HERE for the memory support list. That said, any reputable memory (gskill, corsair, kingston, mushkin, etc) should work with your board. Your m/b manual also has a list of "officially supported" ram. Mark 0 I know I'm upping an old topic, but since I got to this page, I'll hopes it help someone. If you consider O.C. memory unit, a.k.a. >1333MHz, make sure the latency AND voltage match as well. The M5A97 R2.0 Does support, e.g.: 4*4gb @ 2133Mhz. But specifically @ 9-9-9-24. I overpaid some 2133Mhz 11-11-11-27 and can't use the XMP. Ending up with regular overpriced 1333Mhz stick! 0 I have had some problem getting the right ram Asus are now telling me the manual QVL list is different to the online one. I recently tried corsair vengeance pro 1866mb: 8 gb dual channel and it didn't work. However the corsair vengeance 1600mbz is in the manual as compatible. 0 Actually, you bought memory with a higher clock than what was listed as supported, and even though the motherboard support up to 2333MHz THAT ram module is not listed. As a matter of fact, the memory module I put on my mother board was 2133Mhz at a latency of 13-13-13 , the motherboard supported 9-9-9, so my modules having a higher latency, the motherboard should have been able to use it. Asus answer was "Logically it should've... But it don't..." I really feel that the QVL is a way for MoBo manufacturers to protect themselves... Even though the brand listed are unattractive "Apacer for example", stick to the QVL or you won't win = All Orders Shipped From The UK. Our Customer Reviews Found this company on a Google search. Very competitive prices and smooth and efficient ordering and delivery. Will definitely use again. on 2022-03-17 I have nothing but praise for MemoryCow, their customer service people are so helpful, they were able to give me good advice and sole the problem I was having with storage on my mobile phone. on 2022-03-16 First class all the way would recommend to anyone. on 2022-03-15 Highly recommended this seller. Excellent customer service. Thx. on 2022-03-13 Memorycow is a great website for buying dual USB C drive sticks. Ordered it and it came early. on 2022-03-12 Very satisfy, would buy from Memory Cow again. on 2022-03-11 Awarded the eKomi Gold Seal of Approval!
